$$\begin{array}{r} 2 \\ + 2 \\ \hline 5 \end{array} \text{ The sum can be greater than the parts—if they're the right parts.}$$

Traditional offshoring has a poor reputation, and yet companies everywhere strain under the escalating costs and pressure of continual innovation. What's the answer?

Reengineer offshoring. That's what we have done. Find out more on our website or drop us a line.

evolve your business.

Is innovation integral to your company's growth strategy? Then look to us for a partnership that gives you a smarter, faster, and more resilient business.

Synergy-IT was founded on a bold vision: to evolve the model of global collaboration. Why? So we could deliver the true benefits of offshore IT development to our clients. To fulfill that promise we do a lot of things differently—from the way we hire and train to the way we work with customers.

The result is a uniquely creative and collaborative company that helps drive innovation, growth, and competitive advantage for its clients.

Innovation Incubator

Don't let a lack of funding or access to programmers stand in your way of realizing your great idea—**collaborate with us.**

- Create your dream product without loans or outside funding
- Take an idea from hatching to phoenix—we'll help you get there
- Tap into our development expertise and innovation engine
- Consult with us on everything from details to market domination plans

Team Extensions

- Working with high-performing distributed teams allows you to reach strategic goals at an affordable price.
- Drive innovation and create IT-based competitive advantages
- Execute large, complex projects you couldn't otherwise afford
- Reduce your IT development costs and speed up time to market
- Scale your IT services rapidly—up or down as needed

Project Outsourcing

Do you have a discrete, well-defined project? An IT-related problem to solve? **We can help.**

- Gain a sustained competitive advantage
- Capitalize on mobile, social, and cloud technology trends
- Stretch your IT development budget without sacrificing quality
- Focus on the core competencies of your business
